Dear Hiring Manager,

I am writing to apply for a Quality Assurance role where my experience in manual testing, automation, API testing, performance testing, and security assessment can add value.

Currently, I work as a Senior Executive – Quality Assurance at Mediaware, handling end-to-end testing, automation, performance testing, and security audits. I have also worked on AI and ML platforms, gaining hands-on experience with complex systems.

I bring a balanced approach to quality, automation, and security and enjoy collaborating with engineering teams to deliver stable and secure products.

Sincerely,

Ruturaj Sharbidre
